

# Anechoic Chamber Room

## Microwave chamber room overview

We support Anechoic chamber rooms for RF measurement, which is for mobile terminals, WiFi, Bluetooth, etc. Not only room itself, supporting total solution including Positioner (Turntable), measurement equipment, which is flexible supported for several systems as Solution Partner of Keysight Technologies Inc.

### Spec. example

Size : 5400 x 9400 x 4000 mm  
Frequency : 400MHz ~ 110GHz  
Test Range :  
Max. 6000mm QZ  $\phi$  1000mm

## mm-wave chamber room overview

Available for the evaluation of mm-wave collision prevention becoming standard equipment to Vehicle application. Installing Traverse (Rail for mobile) enable to shift the measuring distance flexible as option, and we could support as customization. Also, we have supported MRT7681, which is radar Target Simulator, for collision prevention development.

### Spec. example

Size : 3200 x 6200 x 3200 mm  
Frequency : 800MHz~40GHz  
75GHz~110GHz  
Test range : around 4000mm  
QZ  $\phi$  1000mm  
Anechoic performance :  
800MHz -30dB  
1GHz -35dB  
3GHz~110GHz -45dB
