

# mm-wave Measurement System

## System Overview

MWF will be able to propose Total Solution measurement system including anechoic chamber box, measurement equipment, jig etc. for mm-wave band like a collision prevent radar, WiGig, next generation 5G, etc.

## System example

## Spec. example

| Parameter | Spec.                 |
|-----------|-----------------------|
| Size      | W1.0m x D2.5m x H1.5m |
| Side door | 2 doors               |
| Absorber  | MA-3                  |
| Option    | Turn Table            |
|           | Elevation             |
|           | Lab Jack              |
|           | Horn Antenna          |
|           | Corner Reflector      |
|           | LED light             |

\*Available to customize based on customers' demand.

This is a system with anechoic chamber box, which is difference with chamber rooms, and enable user to shrink the cost due to space area down-sizing and shorten lead time. And removal type is more flexible of location.
